

CAGE/PIT/WIRELESS HANDHELD VALIDATION UNIT CHECKLIST

Casino:	
Cage, Pit or Wireless Handheld Unit:	
Unit Number:	
Completed by:(print all names)	

This checklist is to be used for each validation unit in the cage, pit or wireless handheld. This checklist must be completed and pass the requirements outlined below. Any individuals who complete all or any portion of the checklist must sign the document. This checklist must be maintained at the casino and made available to the Division of Gaming upon request. If any of the following fail, document your findings and indicate the next course of action.

CAGE OR PIT (circle which one)

PASS FAIL (initial on line to indicate test results)

- _____ _____ Each cashier or pit using a validation unit has their own login or password to ensure redeemed tickets are under their login

- _____ _____ Manually enter or scan a valid ticket. The validation unit should have a valid ticket message.

- _____ _____ Manually enter or scan a redeemed ticket. The validation unit should indicate a non-valid ticket message.

- _____ _____ Manually enter or scan an expired ticket. The validation unit should indicate a non-valid ticket or expired ticket message.

- _____ _____ Insert \$1 and issue a ticket. The validation unit should print a ticket meeting the requirements in the ICMP. Contact the Division if the ticket does not meet the ICMP requirements.

- _____ _____ If testing a wireless handheld validation unit a ticket cannot be validated outside of the licensed premises (e.g., outside of building, in non-gaming areas of the casino).
