

**Health and Safety Advisory: Trinidad Cultivation Services Inc
(dba Blue Sand Consulting)**

April 12, 2023 - The Colorado Department of Revenue (DOR), in conjunction with the Colorado Department of Public Health and Environment (CDPHE), is issuing a Health and Safety Advisory due to the identification of potentially unsafe levels of Total Yeast and Mold and Aspergillus on Regulated Marijuana flower produced by **Trinidad Cultivation Services Inc (doing business as Blue Sand Consulting)**. The CDPHE and DOR deem it a threat to public health and safety when marijuana is found to have Total Yeast and Mold or Aspergillus above acceptable limits established in [Colorado Marijuana Rule 4-115](#).

Through an investigation, the DOR has identified Harvest Batches produced by Trinidad Cultivation Services Inc. that initially passed contaminant testing, but subsequently failed retesting. The contaminated Harvest Batches listed below were sold to patients or consumers between October 26, 2022 and March 21, 2023.

Consumers who have this affected marijuana in their possession should destroy it or return it to the Regulated Marijuana Store from which it was purchased for proper disposal. Consumers who experience adverse health effects from consuming the marijuana flower should seek medical attention immediately and report the event to the Marijuana Enforcement Division by submitting the [MED Reporting Form](#).

All affected marijuana has a label affixed to the container that, at a minimum, indicates the license number of the Regulated Marijuana Business that cultivated the marijuana and the Harvest Batch number assigned to the marijuana. Consumers should check the label of their Regulated Marijuana for the following Regulated Marijuana Cultivation Facility license number and Harvest Batch numbers.

Retail Marijuana Cultivation Facility: 403R-00753

Total Yeast and Mold and Aspergillus Contaminated Harvest Batches:

Scoops of Chem

Skunk
