Topic: Timelines for sharing applications with the State

I would like to express my disagreement with the idea that clerks might have to submit a license renewal application to the state PRIOR to it having been reviewed and approved by the Local Licensing Authority. I always submit the renewal application, along with the applicant's check to the state, within 4 days of the review and approval of the LLA.

It has not happened yet, but what if the LLA was to deny the renewal? Would the State still issue a license and cash the applicant's check? Then what? Who really has authority at that point to license (or deny the license) if the State can issue a license prior to the review and decision of the LLA?
